

1. Record Nr.	UNINA9910451531603321
Autore	Higman Chris
Titolo	Gasification [[electronic resource] /] / Christopher Higman and Maarten van der Burgt
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Gulf Professional Pub./Elsevier Science, 2008
ISBN	1-281-18956-1 9786611189563 0-08-056090-3
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (452 p.)
Altri autori (Persone)	BurgtMaarten van der
Disciplina	665.7/72
Soggetti	Coal gasification Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Contents; Notes on the authors; Preface to second edition; Preface to first edition; Chapter 1 Introduction; 1.1 Historical development of gasification; 1.2 Gasification today; References; Chapter 2 The thermodynamics of gasification; 2.1 Reactions; 2.2 Thermodynamic modeling of gasification; 2.3 Deductions from the thermodynamic model; 2.4 Optimizing process conditions; References; Chapter 3 The kinetics of gasification and reactor theory; 3.1 Kinetics; 3.2 Reactor theory; 3.3 Applications to reactor design; References; Chapter 4 Feedstocks and feedstock characteristics 4.1 Coals and coke 4.2 Liquid and gaseous feedstocks; 4.3 Biomass; 4.4 Wastes; References; Chapter 5 Gasification processes; 5.1 Moving-bed processes; 5.2 Fluid-bed processes; 5.3 Entrained-flow processes; 5.4 Oil gasification and partial oxidation of natural gas; 5.5 Biomass gasification; 5.6 Gasification of wastes; 5.7 Black liquor gasification; 5.8 Miscellaneous gasification processes; References; Chapter 6 Practical issues; 6.1 Effect of pressure; 6.2 Pressurization of coal; 6.3 Coal sizing and drying; 6.4 Reactor design; 6.5 Burners; 6.6 Synthesis gas cooling; 6.7 Particulate removal 6.8 Process measurement 6.9 Trace components in raw synthesis gas; 6.10 Choice of oxidant; 6.11 Corrosion aspects; References; Chapter 7 Applications; 7.1 Chemicals; 7.2 Synfuels; 7.3 Power; References;

Chapter 8 Auxiliary technologies; 8.1 Oxygen supply; 8.2 Synthesis gas treating; 8.3 Catalytic gas conditioning; 8.4 Cryogenic gas treatment; 8.5 Sulfur recovery; References; Chapter 9 Economics, environmental and safety issues; 9.1 Economics; 9.2 Environmental issues; 9.3 Safety; References; Chapter 10 Gasification and the future; References; Appendix A: Companion website
Appendix B: Conversion factors Appendix C: Emissions conversions; Appendix D: Guidelines for reporting operating statistics for gasification facilities; Appendix E: Basis for calculations; Nomenclature; List of names and abbreviations; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W; Z

Sommario/riassunto

Gasification is a process that if properly utilized can transform the world in which we live. Comprehensive in its coverage, this second edition continues the tradition of the first by providing engineers and scientists with an up-to-date overview of commercial processes and applications relevant to today's demands. Gasification, 2nd edition is expanded and provides more detail on the integration issues for current generation, state-of-the-art Integrated Gasification Combined Cycles (IGCC); CO₂ capture in the IGCC context addressing the issues of pre-investment and retrofitting as well as def
