Sommario/riassunto	Researching Language in Schools and Communities is designed for those who intend to carry out and / or study research in children's language development, teaching English as a second language, children's literature, casual conversation, social class and language variation, classroom discourse, reading processes, teaching writing, literacy and curriculum area learning, critical literacies and related areas. The contributors are among the foremost researchers in these

fields. In this book they introduce approaches to help investigate such areas in applied language research using systemic
