Sommario/riassunto

This volume gives an extensive overview of current developments in the field of archival collections relating to German-speaking refugees located in Germany, Austria, the USA, Ireland and the UK. The contributions illustrate the three interlinked areas of refugee archives, Exile and Migration Studies research and related databases and other resources. The articles investigate their interrelationship as well as the future challenges facing all three areas by focussing on larger archival holdings as well as collections relating to individuals and organisations and more recently established electronic and online resources and finding aids. The volume is aimed at researchers and archival practitioners alike and should be especially useful for anyone starting out in the field.
