| Nota di bibliografia | Includes bibliographical references (p. 217-225) and index. |
| Nota di contenuto | The logic of the market : an investigation of first principles -- Prophets and profits : economics and theology in conflict? -- The facts about values -- What makes theology "political"? : come let us reason together -- The theology of economics : Adam Smith as "church" father -- The corporation and everyday economic life : a traditioned theological inquiry -- Corporations and the ends we serve -- Usury : avarice as a capital vice -- A Catholic Church and global market : the tale of two corporations -- Offering our gifts : the politics of remembrance. |
| Sommario/riassunto | Calculated Futures examines the ethical and theological underpinnings of the free-market economy, investigating not only the morality of corporations and exchange rates, but also how the politics of economics shape people as moral agents. It does this less by insisting on the unfavorable effects of capitalism, and more by drawing on theological virtues, Christian doctrines, and liturgical practices to discover what they might show us about economic exchanges. Calculated Futures seeks a way forward by engaging economics as a |

social scientific discipline without subordinating theology to it.
