Sommario/riassunto	Drawing on the latest research in archaeozoology, archaeology, and molecular biology, <i>Animals as Domesticates</i> traces the history of the domestication of animals around the world. From the llamas of South America and the turkeys of North America, to the cattle of India and the Australian dingo, this fascinating book explores the history of the complex relationships between humans and their domestic animals. With expert insight into the biological and cultural processes of

domestication, Clutton-Brock suggests how the human instinct for nurturing may have transformed relationships
