

1. Record Nr.	UNINA9910451605903321
Autore	Clarke George <1951->
Titolo	Justice and science [[electronic resource] ] : trials and triumphs of DNA evidence // George "Woody" Clarke
Pubbl/distr/stampa	New Brunswick, NJ, : Rutgers University Press, 2007
ISBN	1-281-31652-0 9786611316525 0-8135-4394-0
Descrizione fisica	1 online resource (232 p.)
Altri autori (Persone)	RenoJanet
Disciplina	363.25/6
Soggetti	Public prosecutors - California - San Diego County DNA fingerprinting - United States Forensic genetics - United States Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The scientist becomes a victim -- A new prosecutor -- The transition to DNA evidence -- The fight for acceptance -- A stranger rapist and a murderer : early success with DNA evidence -- A double-edged sword : DNA for and against the prosecution -- A child and a critical nightshirt -- DNA and a football hero collide -- Back home again in San Diego : an unusual rape case -- When a match is not a match -- Exonerations, databases & S.T.R.'s -- A national approach -- The D.A.'s office searches for innocence -- DNA takes to television -- The tragic case of a small child -- A cold hit DNA match solves an old crime -- Helena Greenwood revisited.
Sommario/riassunto	Databases of both convicted offenders and no-suspect cases demonstrate the power of DNA testing to solve the unsolvable. George "Woody" Clarke is a leading authority in legal circles and among the news media because of his expertise in DNA evidence. In this memoir, Clarke chronicles his experiences in some of the most disturbing and notorious sexual assault and murder court cases in California. He charts the beginnings of DNA testing in police investigations and the fight for its acceptance by courts and juries. He illustrates the power of

science in cases he personally prosecuted or in which he assisted, including his work with the prosecution team in the trial of O. J. Simpson. Clarke also covers cases where DNA evidence was used to exonerate. He directed a special project in San Diego County, proactively examining over six hundred cases of defendants convicted and sentenced to prison before 1993, with the goal of finding instances in which DNA typing might add new evidence and then offered testing to those inmates. As Clarke tells the story of how he came to understand and use this new form of evidence, readers will develop a new appreciation for the role of science in the legal system.
