

1. Record Nr.	UNINA9910451628803321
Autore	Brook Timothy <1951-, >
Titolo	The Chinese state in Ming society // Timothy Brook
Pubbl/distr/stampa	London ; ; New York : , : RoutledgeCurzon, , 2005
ISBN	1-280-24111-X 1-134-28375-X 0-203-31133-7 9786610241118
Descrizione fisica	1 online resource (265 p.)
Collana	Critical Asian scholarship
Disciplina	951/.026
Soggetti	Electronic books. China Politics and government 1368-1644 China Social conditions 960-1644
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Simultaneously published in the USA and Canada by RoutledgeCurzon."--T.p. verso.
Nota di bibliografia	Includes bibliographical references (p. [191]-242) and index.
Nota di contenuto	Part 1. Space -- The spatial organization of subcounty administration -- The gazetteer cartography of Ye Chunji -- Part 2. Fields -- Taxing polders on the Yangzi Delta -- Growing rice in North Zhili -- Part 3. Books -- Building school libraries in the mid-Ming -- State censorship and the book trade -- Part 4. Monasteries -- At the margin of public authority: the Ming state and Buddhism -- Buddhism in the Chinese constitution: recording monasteries in North Zhili.
Sommario/riassunto	The Ming dynasty (1368-1644), a period of commercial expansion and cultural innovation, fashioned the relationship between state and society in Chinese history. This unique collection of reworked and heavily illustrated essays, by one of the leading scholars of Chinese history, re-examines this relationship. It argues that, contrary to previous scholarship, it was radical responses within society that led to a 'constitution', not periods of fluctuation within the dynasty itself. Brook's outstanding scholarship demonstrates that it was changes in commercial relations and social networks that we

Sommario/riassunto

Although disorders of the coagulation system are uncommon in pregnancy, the two main hazards - haemorrhage and thromboembolism - are leading causes of direct maternal death in the UK and worldwide. Gynaecologists may encounter abnormal haemostasis as a cause of intractable menorrhagia or perioperative haemorrhage, and thromboembolism is a significant risk for women undergoing major gynaecological surgery. This book brings together various aspects of haemostasis in relation to obstetrics and gynaecology to provide practical guidance to clinicians, who may only occasionally encounter these problems. Emphasis is placed on the need for good working relationships and close liaison between obstetricians and gynaecologists, anaesthetists, haematologists and blood transfusion services. The book is primarily designed to provide a comprehensive summary for candidates preparing for the Part 2 MRCOG examination, and as such covers the RCOG curriculum for haemorrhage and thrombosis. It is also a valuable guide for all healthcare professionals working in the field.
