Sommario/riassunto	This book addresses representations and constructions of masculinity in crisis in contemporary French culture by way of two important concepts - the phallus (largely but not solely in (a) Lacanian sense(s)) and abjection (Kristeva). Scrutiny of these concepts informs readings of a number of texts - literary (Bataille, Adamov, Doubrovsky, Houellebecq, Rochefort, Angot) and cinematic (Ferreri, Eustache,

Godard, Noe, Bonello) - in which the abject phallus is a significant factor. The texts chosen all describe or stage crises of masculinity and mastery in ways that suggest that these supposedly be

Sommario/riassunto

This book investigates the strategic use of public procurement as a way to establish “buying green” as a common practice – not only in the EU, but all over the world. However, imposing environmental requirements may affect the conditions of competition between suppliers, especially between local and foreign ones. This is particularly relevant for signatory states to the Government Procurement Agreement (GPA), a plurilateral WTO agreement that aims at liberalizing public procurement markets. So how can these countries strike a balance between trade concerns and using the environmental potential of public procurement? What scope does the GPA 2012 leave for environmental criteria and how are signatory states making use of it? The need for answers to these questions is becoming even more pressing with the increasing use of green public procurement (GPP). This book discusses approaches to finding legal solutions to this question, using a multilayered approach to do so: In a first step, an analysis of the pertinent GPA provisions serves to delineate the scope for GPP under WTO law. In a second step, an evaluation of the implementation of the respective provision at the regional and national level by the EU and Switzerland helps reveal the impact of the GPA on its signatory states. While the book chiefly focuses on the legal framework for GPP, it also takes into account the latest developments in jurisprudence and policy initiatives. It concludes by proposing practical solutions regarding the specific design of GPP policies and measures in compliance with the GPA. The comparative approach applied in the book, focusing on the implementation of the WTO/GPA by two selected signatories, makes it an informative and insightful resource for practitioners, policymakers and legal scholars from all GPA signatory countries, extending its relevance beyond the selected examples (the EU and Switzerland).
