Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Becoming urban in China -- Historical traces -- Regional policies -- Urbanization of the countryside -- New spatial mobilities -- Expanding spaces of personal autonomy -- The governance of city-building -- Backward into the future.
Sommario/riassunto	It is only in the past quarter century that urbanization has emerged in China as a force of social transformation while a massive population shift from country to city has brought about a dramatic revolution in China's culture, politics, and economy. China's Urban Transition synthesizes research to provide the first integrated treatment of the processes that encompass the meaning of urbanization.
