

1. Record Nr.	UNINA9910451670803321
Autore	Thurs Daniel Patrick
Titolo	Science talk [[electronic resource]] : changing notions of science in American popular culture // Daniel Patrick Thurs
Pubbl/distr/stampa	New Brunswick, N.J., : Rutgers University Press, c2007
ISBN	1-281-15130-0 9786611151300 0-8135-4152-2
Descrizione fisica	1 online resource (252 p.)
Classificazione	NK 5250
Disciplina	509
Soggetti	Science - History Science - United States Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 185-224) and index.
Nota di contenuto	Talking about science -- Phrenology -- Evolution -- Relativity -- UFOs -- Intelligent design.
Sommario/riassunto	Science news is met by the public with a mixture of fascination and disengagement. On the one hand, Americans are inflamed by topics ranging from the question of whether or not Pluto is a planet to the ethics of stem-cell research. But the complexity of scientific research can also be confusing and overwhelming, causing many to divert their attentions elsewhere and leave science to the "experts." Whether they follow science news closely or not, Americans take for granted that discoveries in the sciences are occurring constantly. Few, however, stop to consider how these advances—and the debates they sometimes lead to—contribute to the changing definition of the term "science" itself. Going beyond the issue-centered debates, Daniel Patrick Thurs examines what these controversies say about how we understand science now and in the future. Drawing on his analysis of magazines, newspapers, journals and other forms of public discourse, Thurs describes how science—originally used as a synonym for general knowledge—became a term to distinguish particular subjects as elite forms of study accessible only to the highly educated.
