Sommario/riassunto	The popular features from Volume 1 are all here. The field-tested probes are short, easy to administer, and ready to reproduce. Teacher

materials explain science content and suggest grade-appropriate ways to present information. But Volume 2 covers more life science and Earth and space science probes. Volume 2 also suggests ways to embed the probes throughout your instruction, not just when starting a unit or topic.

Sommario/riassunto	"For Strasbourg consists of a series of essays and interviews by French philosopher and literary theorist Jacques Derrida (1930-2004) about the city of Strasbourg and the philosophical friendships he developed there over a forty year period. It is a profound interrogation of the relationship between philosophy and place, philosophy and language, and philosophy and friendship"-- "For Strasbourg consists of a series of essays and interviews by French philosopher and literary theorist Jacques Derrida (1930-2004) about the city of Strasbourg and the philosophical friendships he developed there over a forty year period. Written just months before his death, the opening essay of the collection, "The place name(s): Strasbourg," recounts in great detail, and in very moving terms, Derrida's deep attachment to this French city on the border between France and Germany. More than just a personal narrative, however, it is a profound

interrogation of the relationship between philosophy and place, philosophy and language, and philosophy and friendship. As such, it raises a series of philosophical, political, and ethical questions that might all be placed under the aegis of what Derrida once called "philosophical nationalities and nationalism." The other three texts included here are long interviews/conversations between Derrida and his two principal interlocutors in Strasbourg, Jean-Luc Nancy and Philippe Lacoue-Labarthe. These interviews are significant both for the themes they focus on (language, politics, friendship, death, life after death, and so on) and for what they reveal about Derrida's relationships to Nancy and Lacoue-Labarthe. Filled with sharp insights into one another's work and peppered with personal anecdotes and humor, they bear witness to the decades-long intellectual friendships of these three important contemporary thinkers. This collection thus stands as a reminder of and testimony to Derrida's relationship to Strasbourg and to the two thinkers most closely associated with that city"--
