## Sommario/riassunto

This volume assesses the achievements and limitations of a new set of non-state or multistakeholder institutions that are concerned with improving the social and environmental record of business, and holding corporations to account. It does so from a perspective that aims to address two limitations that often characterize this field of inquiry. First, fragmentation: articles or books typically focus on one or a handful of cases. Second, the development dimension: what does such regulation imply for developing countries and subaltern groups in terms of well-being, empowerment and sustainabil
