

1. Record Nr.	UNINA9910509710303321
Autore	Marius Victorinus, Caius <circa 275-circa 363>
Titolo	Commentari alle epistole di Paolo agli Efesini, ai Galati, ai Filippesi / Mario Vittorino ; edizione critica con introduzione, traduzione italiana, note e indici a cura di Franco Gori
Pubbl/distr/stampa	Torino, : Società Editrice Internazionale, 1981
ISBN	88-05-03685-4
Descrizione fisica	450 p. ; 23 cm
Collana	Corona Patrum ; 8
Disciplina	227.06
Locazione	FLFBC
Collocazione	880.08 CH C.P. (8)
Lingua di pubblicazione	Italiano Latino
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Testo orig. a fronte.

2. Record Nr.	UNINA9910451778803321
Autore	Askins Robert
Titolo	Restoring North America's birds [[electronic resource] ] : lessons from landscape ecology / / Robert A. Askins ; illustrations by Julie Zickefoose
Pubbl/distr/stampa	New Haven, : Yale University Press, [2002]
ISBN	1-281-74069-1 9786611740696 0-300-12711-1
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (349 p.)
Altri autori (Persone)	ZickefooseJulie
Disciplina	333.95/816/097
Soggetti	Birds - Conservation - North America Landscape ecology - North America Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [283]-317) and index.
Nota di contenuto	Front matter -- Contents -- Preface -- Chapter 1.. Grassland Birds of the East Coast -- Chapter 2. Another Quiet Decline -- Chapter 3. The Great Plains -- Chapter 4. Lost Birds of the Eastern Forest -- Chapter 5. Deep-forest Birds and Hostile Edges -- Chapter 6. Industrial Forestry and the Prospects for Northern Birds -- Chapter 7. Birds of the Western Mountain Slopes -- Chapter 8. Declining Birds of Southwestern Floodplains -- Chapter 9. Red-cockaded Woodpeckers and the Longleaf Pine Woodland -- Chapter 10. Landscape Ecology -- Afterword -- Appendix 1. Scientific Names of Organisms Other Than Birds -- Notes -- References -- Index
Sommario/riassunto	The decline of bird species in a wide range of North American habitats--forests, prairies, shrublands, mountain regions, marshes, and deserts--has inspired two decades of intense scientific study of bird ecology and conservation. But for professional scientists and amateur birders alike, interpreting the results of these diverse studies is often complex and bewildering. This accessible book pulls together recent research on bird species and habitats to show how basic ecological principles apply in seemingly different situations. Robert A. Askins provides an engaging introduction to bird ecology and concepts of landscape

ecology, focusing on such intriguing species as Bachman's Warbler, Red Crossbill, Mountain Plover, and Marbled Murrelet. Understanding the ancient landscapes of North America and how humans have changed them, Askins says, is essential for devising plans to protect and restore bird populations. In addition to such obvious changes to the landscape as the clearing of forests and plowing of prairies, more subtle changes also dramatically affect birds. Species may disappear when we interrupt natural disturbances by suppressing wildfires or trapping out beaver, or when we disrupt habitat with roads and housing developments. Askins challenges some of the assumptions that underlie current conservation efforts and offers concrete recommendations, based on sound ecological principles, for protecting the rich natural diversity of North America's birds.
