Sommario/riassunto	Presenting cutting-edge research in syntax and semantics, this important volume furthers theoretical claims in generative linguistics and represents a significant addition to present scholarship in the field. Leading scholars present crosslinguistic studies dealing with clausal architecture, negation, and tense and aspect, and the issue of whether a statistical model can by itself capture the richness of human linguistic abilities. Taken together, these contributions elegantly show how theoretical tools can propel our understanding of language beyond pretheoretical descriptions, especially whe
