measure the quality of health care -- Client satisfaction and the perceived quality of primary health care in Uganda -- Health facility and school surveys in the Indonesia family life surveys -- Collecting data from service providers within the living standards measurement study -- Sharing the gain: some common lessons on measuring service delivery.

Sommario/riassunto

This publication presents tools and techniques for measuring service delivery in health and education and people's experiences from the field in deploying these methods. It begins by providing an introduction to the different methodological tools available for evaluating the performance of the health and education sectors. Country specific experiences are then explored to highlight lessons on the challenges, advantages and disadvantages of using different techniques to measure quality in a variety of different contexts and of using the resulting data to affect change. This book is a valuable r
