Sommario/riassunto	The death of a child has a tremendous and overwhelming impact on parents and siblings, completely altering the psychological landscape of the family. In the aftermath of such a tragedy, parents face the challenge of not only dealing with their own grief, but also that of their surviving children. How can someone attempt to cease parenting a deceased child while maintaining this role with his/her other children? Is it possible for a mother or father to effectively deal with feelings of grief and loss while simultaneously helping their surviving children?
