Sommario/riassunto	El presente libro reúne opiniones de especialistas, profesionales, ex-miembros de organismos reglamentarios y encargados de la formulación de políticas sobre el problema de la expansión de la conectividad en la tecnología de la información y la comunicación (TIC) en el Asia emergente. Trata principalmente de la creencia generalizada que pretende que la tecnología por sí misma -independientemente de las reformas normativas y políticas- puede mejorar el acceso a la TIC. Así, nos muestra que ciertas soluciones complejas son posibles, pero que son a la vez considerablemente menos eficaces que las
