

1. Record Nr.	UNINA9910451943703321
Autore	Haiden Martin <1969->
Titolo	Theta theory [[electronic resource] /] / by Martin Haiden
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, c2005
ISBN	1-283-39650-5 9786613396501 3-11-916657-X 3-11-019747-2
Descrizione fisica	1 online resource (308 p.)
Collana	Studies in generative grammar ; ; 78
Classificazione	GC 7367
Disciplina	413.028
Soggetti	Lexicology Cognition Semantics Grammar, Comparative and general - Syntax German language - Verb Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [275]-289) and index.
Nota di contenuto	Front matter -- Contents -- Chapter 1. From lexical semantics to cognitive psychology, and back again -- Chapter 2. German verbs: lexical representation and argument realization -- Chapter 3. A Bare Phrase Structure of Argument Expression -- Chapter 4. Applications and extensions: participial and infinitival constructions -- Back matter
Sommario/riassunto	Theta Theory explores the lexicon as an interface in the strict sense, as facilitating the flow of information between cognition and the computational system of language. It argues for the traditional concept of a listed lexicon, where semantic roles are encoded as features of verbs, and against event decomposition. Part one of the book discusses the link between cognition and the lexicon. Mainstream theories of lexical semantics are critically reviewed. Furthermore, this part provides an extensive description of the relevant data in German, including agentivity, causation, psychological predicates, and different types of diathesis alternations. Part two is devoted to the link between the

lexicon and syntax. It develops a parallel model of grammatical derivation, which allows the formulation of robust generalizations over thematic role assignment, but at the same time acknowledges the relevance of other components, in particular morpho-phonology and narrow syntax. The theory is applied to a wide range of German constructions including modal infinitives, the present and gerundive participle, the past/passive/adjectival participle, verbal particles, auxiliary selection, and unaccusatives/reflexives. The book is of interest for students and scholars of lexical semantics, for descriptive German linguistics, and for linguists concerned with the development of the Minimalist Program.
