   Sommario/riassunto   The relationship between Law and Anthropology can be considered as having been particularly intimate. In this book the authors defend their assertion that the two fields co-exist in a condition of ""balanced reciprocity"" wherein each makes important contributions to the successful practice and theory of the other. Anthropology, for example, offers a cross-culturally validated generic concept of ""law,"" and clarifies other important legal concepts such as ""religion"" and ""human rights."" Law similarly illuminates key anthropological ideas such as the ""social contract,"" and provides a uni

	Sommario/riassunto	An examination of how societies, cultures, political structures, and the global environment affect countries' military organisations. Unlike most analyses of countries' military power, which focus on material and basic resources - such as the size of population, technological and industrial base, and gross national product (GNP) - this volume takes a more

expansive view. Its overarching argument is that states' global environments and the particularities of their cultures, social structures, and political institutions often affect how they organize and prepare for war, and ultimately impact their effectiveness in battle.
