Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Funerals as festivals -- The final passage -- Wakes and other amusements -- Funeral biscuits and funeral feasts -- Mourners' rites -- Explaining the festival and the American way of death.
Sommario/riassunto	When Evelyn Waugh wrote <i>The Loved One</i> (1948) as a satire of the elaborate preparations and memorialization of the dead taking place in his time, he had no way of knowing how extraordinarily creative and technical human funerary practices would become. Jacqueline S. Thursby explores how modern American funerals and their accompanying rituals seem meant to benefit the living rather than the dead. <i>Funeral Festivals in America</i> suggests that there is an irony in the festivities surrounding death and that the American response to death often develops into an event celebrating the ties between family

Sommario/riassunto

New towns—large, comprehensively planned developments on newly urbanized land—boast a mix of spaces that, in their ideal form, provide opportunities for all of the activities of daily life. From garden cities to science cities, new capitals to large military facilities, hundreds were built in the twentieth century and their approaches to planning and development were influential far beyond the new towns themselves. Although new towns are notoriously difficult to execute and their popularity has waxed and waned, major new town initiatives are increasing around the globe, notably in East Asia, South Asia, and Africa. *New Towns for the Twenty-First Century* considers the ideals behind new-town development, the practice of building them, and their outcomes. A roster of international and interdisciplinary contributors examines their design, planning, finances, management, governance, quality of life, and sustainability. Case studies provide histories of new towns in the United States, Asia, Africa, and Europe and impart lessons learned from practitioners. The volume identifies opportunities afforded by new towns for confronting future challenges related to climate change, urban population growth, affordable housing, economic development, and quality of life. Featuring inventories of classic new towns, twentieth-century new towns with populations over 30,000, and twenty-first-century new towns, the volume is a valuable resource for governments, policy makers, and real estate developers as well as planners, designers, and educators. Contributors: Sandy Apgar, Sai Balakrishnan, JaapJan Berg, Paul Buckhurst, Felipe Correa, Carl Duke, Reid Ewing, Ann Forsyth, Robert Freestone, Shikyo Fu, Pascaline Gaborit, Elie Gamburg, Alexander Garvin, David R. Godschalk, Tony Green, ChengHe Guan, Rachel Keeton, Steven Kellenberg, Kyung-Min Kim, Gene Kohn, Todd Mansfield, Robert W.
