Sommario/riassunto	The Pre-hospital Obstetric Emergency Training (POET) programme provides an introduction to the obstetric patient and the anatomical and physiological changes that occur during pregnancy (including interpretation of patient-held records and rapid assessment of the obstetric patient). It includes clear definitions and describes risk factors, diagnosis and pre-hospital management of significant problems that occur in both early and late pregnancy and the immediate postnatal period. These are all situations that the pre-hospital practitioner may attend. This text and the accompanying inte
