

1. Record Nr.	UNINA9910451997903321
Titolo	Does consciousness cause behavior? [[electronic resource] /] / edited by Susan Pockett, William P. Banks, and Shaun Gallagher
Pubbl/distr/stampa	Cambridge, Mass., : MIT Press, c2006
ISBN	1-282-09670-2 0-262-28169-4 1-4237-6989-9
Descrizione fisica	1 online resource (373 p.)
Altri autori (Persone)	PockettSusan BanksWilliam P GallagherShaun <1948->
Disciplina	153
Soggetti	Consciousness Neuropsychology Mind and body Intention Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The neuroscience of movement / Susan Pockett -- Consciousness of action as an embodied consciousness / Marc Jeannerod -- Intentions, actions, and the self / Suparna Choudhury and Sarah-Jayne Blakemore -- Free choice and the human brain / Richard E. Passingham and Hakwan C. Lau -- Consciousness, intentionality, and causality / Walter J. Freeman -- Where's the action? Epiphenomenalism and the problem of free will / Shaun Gallagher -- Empirical constraints on the problem of free will / Peter W. Ross -- Toward a dynamic theory of intentions / Elisabeth Pacherie -- Phenomenology and the feeling of doing : Wegner on the conscious will / Timothy Bayne -- Free will : theories, analysis, and data / Alfred R. Mele -- Of windmills and straw men : folk assumptions of mind and action / Bertram F. Malle -- Does consciousness cause misbehavior? / William P. Banks -- Free will as a social institution / Wolfgang Prinz -- Truth and/or consequences : neuroscience and criminal responsibility / Leonard V. Kaplan --

Bypassing conscious control : unconscious imitation, media violence, and freedom of speech / Susan Hurley -- Neurosociety ahead?
Debating free will in the media / Sabine Maasen.

Sommario/riassunto

Continuing the debate over whether consciousness causes behaviour or plays no functional role in it, leading scholars discuss the question in terms of neuroscience, philosophy, law and public policy.
