

1. Record Nr.	UNINA9910452059803321
Autore	Eubank R. L (Randy L.)
Titolo	A Kalman filter primer / / R.L. Eubank
Pubbl/distr/stampa	Boca Raton, Fla. : , : Chapman & Hall/CRC, , 2006
ISBN	0-429-11759-0 1-281-32617-8 9786611326173 1-4200-2867-7
Descrizione fisica	1 online resource (199 p.)
Collana	Statistics, textbooks and monographs ; ; v. 186
Disciplina	519.2/3
Soggetti	Kalman filtering Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 183-184) and index.
Nota di contenuto	chapter 1 Signal-Plus-Noise Models -- chapter 2 The Fundamental Covariance Structure -- chapter 3 Recursions for L and L1 -- chapter 4 Forward Recursions -- chapter 5 Smoothing -- chapter 6 Initialization -- chapter 7 Normal Priors -- chapter 8 A General State-Space Model.
Sommario/riassunto	Eubank (mathematics and statistics, Arizona State U.) offers a self-contained, concise rigorous derivation of all the basic Kalman filter recursions from first principles. He lays out the basic prediction problem for signal-plus-noise models, deriving the Gramm-Schmidt algorithm and Cholesky decomposition. He covers the fundamental covariance struc
