Sommario/riassunto	The allocation of resources and the design of policies tailored to local-level conditions require highly disaggregated information. Data on

poverty at the local level is typically not available because most household surveys are not representative past the regional level. This volume aims to promote the effective use of Small Area Estimation poverty maps in policy making. It presents the range of policies and interventions which have been informed by poverty maps, focusing on the political economy of poverty maps and the key elements to their effective use by policy makers. The volume also loo
