

1. Record Nr.	UNINA9910452062003321
Autore	Maroni Gustavo
Titolo	An atlas of Drosophila genes [[electronic resource]] : sequences and molecular features / / Gustavo Maroni with contributions by Stephen M. Mount ... [et al.]
Pubbl/distr/stampa	New York, : Oxford University Press, 1993
ISBN	1-280-52591-6 9786610525911 0-19-802352-9 1-4294-0113-3
Descrizione fisica	1 online resource (428 p.)
Disciplina	595.77/4
Soggetti	Drosophila - Genetics Gene mapping Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; I; II; Appendix; Index
Sommario/riassunto	The common fruitfly, or drosophila, is the most extensively studied of all organisms from the standpoint of genetics and cytology. The aim of this reference is to summarize information about most of the drosophila genes for which the complete nucleotide sequence is known.
