Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 97-107).
Nota di contenuto	v. 1. Synthesis (book) -- v. 2. Background studies (on CD).
Sommario/riassunto	This book identifies the binding constraints to growth of Morocco. It applies an innovative procedure known as "growth diagnostic" and has a central finding. The Moroccan economy suffers from a too slow process of structural transformation for achieving higher growth, especially for its exports that face unfavorable external shocks arising from competitor countries in the main markets for Moroccan exports. This process of so-called "productive diversification" requires that Morocco enhance its competitiveness.
