

1. Record Nr.	UNINA9910452095303321
Autore	Levy Neil <1967->
Titolo	Neuroethics / / Neil Levy [[electronic resource]]
Pubbl/distr/stampa	Cambridge : , : Cambridge University Press, , 2007
ISBN	1-107-17329-9 0-511-81189-6 1-281-08530-8 9786611085308 0-511-34219-5 0-511-34166-0 0-511-34108-3 0-511-55661-6 0-511-34272-1
Descrizione fisica	1 online resource (xiii, 346 pages) : digital, PDF file(s)
Disciplina	174.2928
Soggetti	Neurosciences - Moral and ethical aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Changing our minds -- The presumption against direct manipulation -- Reading minds/controlling minds -- The neuroethics of memory -- The "self" of self-control -- The neuroscience of free will -- Self-deception: the normal and the pathological -- The neuroscience of ethics.
Sommario/riassunto	Neuroscience has dramatically increased understanding of how mental states and processes are realized by the brain, thus opening doors for treating the multitude of ways in which minds become dysfunctional. This book explores questions such as when is it permissible to alter a person's memories, influence personality traits or read minds? What can neuroscience tell us about free will, self-control, self-deception and the foundations of morality? The view of neuroethics offered here argues that many of our new powers to read ,alter and control minds are not entirely unparalleled with older ones. They have, however, expanded to include almost all our social, political and ethical

decisions. Written primarily for graduate students, this book will appeal to anyone with an interest in the more philosophical and ethical aspects of the neurosciences.
