Nota di contenuto	Contents; Acknowledgments; Abbreviations; Executive Summary; Introduction; Part I: The Central Role of Student Learning; Tables; Figures; Boxes; Part II: A Framework for Understanding Student Learning; Part III: Quality Assurance and Beyond; Appendixes; Bibliography; Index
Sommario/riassunto	In the effort to meet enrollment targets for compulsory education in Latin America, the drive to achieve universal coverage seems to have left education quality behind. In the face of meager student performance, understanding what and how students are learning have emerged as salient issues facing policy makers in a region that has already achieved considerable success in the area of access to basic education. As many countries in the region embark on a series of reforms addressing issues of quality and equity in basic education, shifting their focus away from educational expansion, information
