At the Intermediary Stage; 3. At the Last Mile; Appendixes; Bibliography; Map of Remittance Flows in the U.S.-Guatemala Corridor
Sommario/riassunto	This study gives an overview of the intermediation of worker remittance flows from the United States to Guatemala. In contrast to other remittance corridors in the world, most transfers in this corridor are channeled in the United States through the formal sector, and distributed in Guatemala through the banking system. However, both senders and receivers have little access to financial products and services. This study argues that in a country characterized by high income inequality and low and concentrated access to credit, the large role played by domestic banks in distributing remittances

Sommario/riassunto	The Reed's VHF DSC Handbook is a user-friendly guide that gets marine VHF radio users quickly up to speed with both the analogue and digital functions on the radio. Sue Fletcher's straightforward explanations and tips describe the leisure craft VHF DSC radio system in detail and its place within GMDSS. Since it was first published it has

become the standard work on the subject. Updated to take into account new developments and procedures it provides: all the information required to pass the Short Range Certificate (SRC) - which is compulsory for anyone using a VHF DSC radio;radio procedure, ch
