Autore	Benkler Yochai
Titolo	The wealth of networks [[electronic resource]] : how social production transforms markets and freedom / / Yochai Benkler
Pubbl/distr/stampa	New Haven [Conn.], : Yale University Press, c2006
ISBN	1-281-74080-2 9786611740801 0-300-12723-5
Descrizione fisica	1 online resource (528 p.)
Disciplina	303.48/33
Soggetti	Information society Information networks Computer networks - Social aspects Computer networks - Economic aspects Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (p. 475-490) and index.
Nota di contenuto	Introduction: a moment of opportunity and challenge -- The networked information economy -- Some basic economics of information production and innovation -- Peer production and sharing -- The economics of social production -- The political economy of property and commons -- Individual freedom: autonomy, information, and law -- Political freedom part 1: the trouble with mass media -- Political freedom part 2: emergence of the networked public sphere -- Cultural freedom: a culture both plastic and critical -- Justice and development -- Social ties: networking together -- Policies of freedom at a moment of transformation -- The battle over the institutional ecology of the digital environment -- Conclusion: the stakes of information law and policy.
Sommario/riassunto	With the radical changes in information production that the Internet has introduced, we stand at an important moment of transition, says Yochai Benkler in this thought-provoking book. The phenomenon he describes as social production is reshaping markets, while at the same time offering new opportunities to enhance individual freedom, cultural

diversity, political discourse, and justice. But these results are by no means inevitable: a systematic campaign to protect the entrenched industrial information economy of the last century threatens the promise of today's emerging networked information environment. In this comprehensive social theory of the Internet and the networked information economy, Benkler describes how patterns of information, knowledge, and cultural production are changing-and shows that the way information and knowledge are made available can either limit or enlarge the ways people can create and express themselves. He describes the range of legal and policy choices that confront us and maintains that there is much to be gained-or lost-by the decisions we make today.
