Sommario/riassunto

This book completes the two-part series that serves as the final report for the excavation of the Cave of the Cyclops on the island of Youra in the Northern Sporades of Greece, a site that was occasionally occupied from the Mesolithic through Roman period. The second volume contains the results of detailed studies on the archaeological material, organic remains, and archeometric analyses that complete the image of this significant archaeological site. These studies help to further distinguish the main characteristics of the Mesolithic culture in the Aegean basin, including: the intense exploit
