Sommario/riassunto

Excavations carried out at two Late Minoan III sites at Mochlos in eastern Crete yielded a pottery assemblage from 31 tombs and 11 houses, which are cataloged, discussed, and illustrated together with petrographic analyses. The cemetery remains mirror the settlement remains, and the conclusions discuss how the two sites reflect each other. Rarely in Crete are a settlement and its cemetery both preserved, and it is extremely fortunate to be able to document both in a series of scientific excavation reports (Mochlos IIA-IIC).
