Sommario/riassunto

Volume 3 of the Organizing for Sustainable Effectiveness series gives readers insights into how organizations use networks, partnerships, and collaboration to achieve better and more sustainable results. Volume editors Christopher Worley and Philip Mirvis contend that globalization and its complexities have produced economic, social, and environmental challenges that cannot be addressed effectively by single organizations acting alone. Informed by individual and comparative case studies contributed by 13 authors from around the world, the volume delves into how organizations build collaborativ
