Sommario/riassunto	Energy efficiency is an important factor in an economy, since it helps meet energy needs, decrease costs, and lower environmental impacts. A review of the evolution of energy intensity in European and Former Soviet Union countries indicates a positive trend: high-energy-intensity countries have now reached the level of medium-energy-intensity economies 15 years earlier, and in the same period, medium-energy-intensity ones had similarly evolved to levels of low-energy-intensity. At the same time, the fast transitioning economies of Central Europe converged towards similar levels of energy inten

Sommario/riassunto

Over the past 20 years, Boeotia has been the focus of intensive archaeological investigation that has resulted in some extraordinary epigraphical finds. The most spectacular discoveries are presented for the first time in this volume: dozens of inscribed sherds from the Theban shrine of Heracles; Archaic temple accounts; numerous Classical, Hellenistic and Roman epitaphs; a Plataean casualty list; a dedication by the legendary king Croesus. Other essays revisit older epigraphical finds from Aulis, Chaironeia, Lebadeia, Thisbe, and Megara, radically reassessing their chronology and political and legal implications. The integration of old and new evidence allows for a thorough reconsideration of wider historical questions, such as ethnic identities, and the emergence, rise, dissolution, and resuscitation of the famous Boeotian koinon . Contributors include: Vassilios Aravantinos, Hans Beck, Margherita Bonanno, Claire Grenet, Yannis Kalliontzis, Denis Knoepfler, Angelos P. Matthaiou, Emily Mackil, Christel Müller, Nikolaos Papazarkadas, Isabelle Pernin, Robert Pitt, Adrian Robu, and Albert Schachter.
