Sommario/riassunto

<P>This book analyses the evolution of the sustainability discourse in the European Union, exploring the conditions necessary for sustainable development to move from a conceptual model into a model for action for strategic decision makers at all levels of governance.
</P><P></P><P>This book questions the extent to which the discourse on sustainability has become embedded into governance structures in Europe. It focuses on the importance of the nature of the language of the political discourse on sustainability and how ideas are communicated amongst the actors and stakeholders in the policy ma
