

1. Record Nr.	UNINA9910452318303321
Autore	Bokshtein B. S (Boris Samuilovich)
Titolo	Thermodynamics and kinetics in materials science [[electronic resource] ] : a short course // Boris S. Bokstein, Mikhail I. Mendeleev, and David J. Srolovitz
Pubbl/distr/stampa	New York, : Oxford University Press, 2005
ISBN	0-19-191663-3 1-280-84703-4 0-19-152368-2 1-4294-6925-0
Descrizione fisica	1 online resource (341 p.)
Collana	Oxford scholarship online
Altri autori (Persone)	MendeleevMikhail I SrolovitzDavid J
Disciplina	536/.7
Soggetti	Thermodynamics Chemical kinetics Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previously issued in print: 2005.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; 1 Basic laws of thermodynamics; 2 Phase equilibria I; 3 Thermodynamic theory of solutions; 4 Phase equilibria II; 5 Thermodynamics of chemical reactions; 6 Interfacial phenomena; 7 Thermodynamics of stressed systems; 8 Kinetics of homogeneous chemical reactions; 9 Thermodynamics of irreversible processes; 10 Diffusion; 11 Kinetics of heterogeneous processes; 12 Introduction to statistical thermodynamics of gases; 13 Introduction to statistical thermodynamics of condensed matter; Appendices; Example problem solutions; Index
Sommario/riassunto	This text presents a concise and thorough introduction to the main concepts and practical applications of thermodynamics and kinetics in materials science. It is designed with two types of uses in mind: firstly for a one or two semester university course for mid- to upper-level undergraduate or first year graduate students in a materials-science-oriented discipline and secondly for individuals who want to study the material on their own.
