 DATA DESCRIPTION

Sommario/riassunto

Following the Earth Summit in Rio de Janeiro in 1992, countries took up the difficult task of finding a common approach that would slow down the build-up of greenhouse gas emissions in the atmosphere and delay changes to the planet's climate. A widespread concern among many of the participants in the newly formed United Nations Framework Convention on Climate Change was that the emission reductions needed to significantly affect climate change would cost so much that it could jeopardize the chances of a coordinated international solution. To address this concern, several flexible mechanisms were

Sommario/riassunto	Erstmals werden mit diesem Buch visuelle Darstellungen von Migrant*innen im Kontext der Arbeitsmigration in der Bundesrepublik Deutschland anhand von Presse- und Privatfotografien untersucht. Für den Zeitraum von 1960 bis 1982 analysiert Claudia Valeska Czycholl in Spiegel und Stern kursierende Fremdbilder von Migrant*innen. Sie zeichnet diskursive Verläufe nach, fokussiert zentrale Stadien und Themen und identifiziert dominante Repräsentationsmuster. Zudem hinterfragt sie mittels fotografischer Selbstkonstruktionen von Migrant*innen diese hegemonialen Darstellungsweisen und hierarchisierenden Erzählungen von ›Uns‹ und ›Ihnen‹, von ›Wir‹ und den ›Anderen‹. Die Studie gibt so Einblick in tradierte Differenzkonstruktionen und stereotype Vorstellungen und liefert Materialien sowie theoretisch-methodische Ansätze, um sie zu

hinterfragen.
