| Sommario/riassunto      | Since the global financial crisis, corporate investment has been weak in India. Sluggish corporate investment would not only moderate growth from the demand side but also constrain growth from the supply side over time. Against this background, this paper analyzes the reasons for the slowdown and discusses how India can boost corporate investment, using both macro and firm-level micro data. Analysis of macro data indicates that macroeconomic factors can largely explain corporate investment but that they do not appear to account fully for recent weak performance, suggesting a key role of the bu  |

## Sommario/riassunto

The conversos of late medieval and Golden Age Spain were Christians whose Jewish ancestors had been forced to change faiths within a society that developed a preoccupation with pure Christian lineage. The aims of this book is to shed new light on the cultural impact of this social climate, in which public suspicion of the religious sincerity of conversos became widespread and scrutiny by the Inquisition came to impede social advancement and threaten life and property. The bulk of the essays center on literary works, including lesser known and canonical pieces, which are analyzed by scholars who reveal the heterogeneous nature of textual voices that are informed by an awareness of the marginal status of conversos. Contributors are Gregory B. Kaplan, Ana Benito, Patricia Timmons, David Wacks, Bruce Rosenstock, Laura Delbrugge, Michelle Hamilton, Deborah Skolnik Rosenberg, Kevin Larsen and Luis Bejarano.
