Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. 1. The domain name registration system : overview and international perspectives -- pt. 2. Comparative analysis : consumer protection and growth in domain name registrations in the United Kingdom and Australia.
Sommario/riassunto	"This book offers a comparative analysis of the domain name registration systems in Australia and the United Kingdom. It analyses global trends and international perspectives of domain name registration systems and the dynamics in the respective domain name systems. The research project explores the advantages and disadvantages of the restrictive domain name registration system and the less restrictive registration system by addressing issues of consumer protection and promoting growth in the number of domain name registrations. The book analyses several different types of domain name registration systems and analyses the regulatory frameworks in the restrictive and unrestrictive registration systems. It considers recent developments in this area such as the new transfer

rules in Australia which allows for the sale of domain name licence, the new Business Name Registration rules due to enter into force in 2011 in Australia, and the new policy rules on domain name dispute resolution in the United Kingdom. Jenny Ng also examines the legal and economic implications of these regulatory frameworks, drawing upon economic theory, regulatory and systems theory as well as legal analysis and comparison of regulatory frameworks. In doing so the work puts forwards ways in which such systems could be better designed to reflect the needs of the specific circumstances in individual jurisdictions"--

"This book offers a comparative analysis of the domain name registration systems utilised in Australia and the United Kingdom. Taking an international perspective, the author analyses the global trends and dynamics of the domain name registration systems and explores the advantages and disadvantages of restrictive and less restrictive systems by addressing issues of consumer protection. The book examines the regulatory frameworks in the restrictive and unrestrictive registration systems and considers recent developments in this area. Jenny Ng also examines the legal and economic implications of these regulatory frameworks, drawing upon economic theory, regulatory and systems theory as well as applying rigorous legal analysis. In doing so, this work proposes ways in which such systems could be better designed to reflect the needs of the specific circumstances in individual jurisdictions. The Domain Name Registration System will be of particular interest to academics and students of IT law and e-commerce"--
