Sommario/riassunto

This volume presents the final report on the excavation of two
Prepalatial tholos tombs and their associated remains at Chatzinas
Liophyto near the Moni Odigitria (monastery) in south-central Crete.
The grave goods and burial remains include pottery, metal objects,
chipped stones, stone vases, gold and stone jewelry, sealstones, and
human skeletal material. The results of the associated survey of the
upper catchment of the Hagiopharango region are also reported. The
book finishes with a reappraisal of our understanding of the early
settlement of the Hagiopharango and a Greek summary.
