Sommario/riassunto	Excavations carried out at the Late Minoan III settlement and cemetery at Mochlos in eastern Crete yielded domestic artifacts, human remains, grave goods, and ecofactual material from 31 tombs and 11 houses. These objects are catalogued, discussed, and illustrated. Radiocarbon

dates for the site are also presented. The cemetery remains mirror the settlement remains, and the conclusions discuss how the two sites reflect each other. Rarely in Crete are a settlement and its cemetery both preserved, and it is extremely fortunate to be able to document both in a series of scientific excavation repo
