Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Note generali Description based upon print version of record. Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Contents: List of contributors: 1 What are the non-motor symptoms of Parkinson's disease?; 2 Non-motor symptoms and pre-motor diagnosis of Parkinson's disease; 3 Non-motor symptoms in the early motor stages of Parkinson's disease: 4 Non-motor symptoms in advanced Parkinson's disease; 5 Assessment tools for non-motor symptoms of Parkinson's disease; 6 Imaging non-motor aspects of Parkinson's disease; 7 Non-motor signs in genetic forms of Parkinson's disease; 8 Cognitive dysfunction of Parkinson's disease; 9 Depression, anxiety and apathy in Parkinson's disease 10 Dementia in Parkinson's disease11 Fatigue in Parkinson's disease; 12 Psychosis in Parkinson's disease; 13 Neurobiology of sleep: the role of dopamine in Parkinson's disease; 14 REM sleep behaviour disorder in Parkinson's disease; 15 Parkinson's disease and restless legs syndrome; 16 Excessive daytime sleepiness in Parkinson's disease; 17 Bladder dysfunction in Parkinson's disease; 18 Sexuality in Parkinson's disease; 19 Gastrointestinal dysfunctions in Parkinson's disease; 20 Postural

hypotension in Parkinson's disease; 21 Sialorrhoea in Parkinson's

disease

22 Olfaction in Parkinson's disease23 Chronic pain and Parkinson's disease; 24 Ophthalmological aspects of Parkinson's disease; 25 Non-motor symptoms and health-related quality of life; 26 Non-motor symptoms and co-morbidity in Parkinson's disease; 27 Non-motor symptoms of Parkinson's disease and the effects of deep brain stimulation; 28 Impulse dyscontrol and dopamine dysregulation syndrome; 29 Treatment-related non-motor symptoms in Parkinson's disease; Index; A; B; C; D; E; F; G; H; I; K; L; M; N; O; P; Q; R; S; T; V; W; Y: Z

Sommario/riassunto

Patients with Parkinson's disease (PD) are known to suffer from motor symptoms of the disease, but they also experience non-motor symptoms (NMS) that are often present before diagnosis or that inevitably emerge with disease progression. The motor symptoms of Parkinson's disease have been extensively researched, and effective clinical tools for their assessment and treatment have been developed and are readily available. In contrast, researchers have only recently begun to focus onthe NMS of Parkinson's Disease, which are poorly recognized and inadequately treated by clinicians. The NMS of PD ha
