Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Description based upon print version of record. Note generali Nota di bibliografia Includes bibliographical references and index. Nota di contenuto Contents: Preface: 1 Normal sleep: 2 Diagnosing sleep disorders: 3 Insomnia; 4 Hypersomnia; 5 Parasomnias; 6 Circadian rhythm sleep disorders: 7 Psychiatric disorders and sleep: 8 Sleep disorders associated with neurological and medical disorders; 9 Pharmacology of sleep; 10 Coping with irregular working hours: preventing sleep problems in junior doctors, nurses and other health professionals; 11 Appendix; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W; Z Sommario/riassunto Sleep dysfunction is one of the primary symptoms reported by patients with psychiatric disorders, and specifically those suffering from anxiety and depressive disorders. Conversely, primary insomnia and other sleep disorders produce symptoms of mood disturbance that are quite similar to those reported by patients with psychiatric disorders. Because of this overlap in the symptoms and treatments for insomnias and psychiatric disorders, it is important for clinicians to be able toaccurately identify the root cause of sleep dysfunction in individual

patients in order to optimize treatment. Part of
