| Sommario/riassunto      | Andrew Fiala's Against Religion, Wars, and States: The Case For Enlightenment Atheism, Just War Pacifism, and Liberal-Democratic Anarchism argues that we need to overcome the idea of the nation-state and look toward global justice, that we need to develop a more critical stance toward religion while embracing enlightened humanism and natural science, and that we need to look beyond violent solutions to social problems in order to build world peace.                                                                                                                       |
