

1. Record Nr.	UNINA9910452641803321
Titolo	Post-2020 climate change regime formation [[electronic resource] /] / edited by Suh-Yong Chung
Pubbl/distr/stampa	Milton Park, Abingdon, Oxon, : Routledge, 2013
ISBN	1-138-92685-X 0-203-38335-4 1-135-97410-1
Descrizione fisica	1 online resource (192 p.)
Collana	Routledge Advances in Climate Change Research Routledge advances in climate change research ; ; 3
Altri autori (Persone)	ChungSuh-Yong
Disciplina	956.94
Soggetti	Climatic changes - Government policy - International cooperation Climatology - International cooperation Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Title Page; Copyright Page; Table of Contents; List of illustrations; Notes on contributors; Acknowledgments; Introduction and overview; 1 Why the world has failed to slow global warming; 2 Is an international climate treaty worth fighting for?; 3 Post-2020 climate change regime building: an advanced developing country's perspective; 4 Post-Durban prospects for low-carbon green growth; 5 Climate negotiations: how to break the impasse and deliver; 6 China's transition toward a low-carbon economy: a review of the 11th Five Year Plan 7 Moving forward in the climate change policies and practicesConclusion; Index
Sommario/riassunto	"The fate of the climate change regime hangs in the balance as the UN-led negotiations try to forge a new international strategy for the post-2020 period. Since 1992, the UNFCCC and its Kyoto Protocol has been the primary legal instrument to respond to the climate challenge. However, the intergovernmental process has been riddled with problems that have rendered it ineffective. The changing economic landscape has further made this country grouping problematic as some developing countries now emit more than some of their advanced

counterparts. Such problems have crippled the existing climate regime in adequately addressing climate change. Building upon the expertise of the contributors of this volume, this groundbreaking collection aims to show the way forward for the intergovernmental process. It is the first of its kind to explore the key features of the regime, featuring meticulously researched pieces from leading experts in the field. Each chapter responds to the questions surrounding the political and structural limitations of the current top-down approach taken in climate negotiations and proposes various alternatives countries can take to overcome such limitations in the process of building the post-2020 climate regime. In particular, this collection underscores the concept of low-carbon development and green growth to make the climate change regime more effective. "--
