

1. Record Nr.	UNINA9910452649503321
Autore	Ottosson Hans
Titolo	Practical project management for building and construction [[electronic resource] /] / Hans Ottosson
Pubbl/distr/stampa	Boca Raton, : ESI International, : CRC Press, c2013
ISBN	0-429-11296-3 1-4398-9656-9
Edizione	[1st edition]
Descrizione fisica	1 online resource (315 p.)
Collana	ESI International project management series ; ; 11
Disciplina	624.068/4
Soggetti	Construction projects - Management Project management Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"An Auerbach book"--cover.
Nota di contenuto	Front Cover; Contents; The Author; Chapter 1 - Introduction; Chapter 2 - General Information on Projects in the Building, Construction, and Installation Industries; Chapter 3 - Projects; Chapter 4 - Generic Main Processes; Chapter 5 - Project Phases; Chapter 6 - Knowledge Areas; Common Acronyms; Appendices; Back Cover
Sommario/riassunto	"With thousands of years of accumulated knowledge you must wonder if we builders really have anything new to learn. In the mid-1900s space flights, technologically advanced weapons systems and the computer industry began to run large and complex projects. New tools and techniques to succeed in complex projects were developed, primarily by NASA, the U.S. military and the IT-industry. Clients began to require some form of knowledge for Project Managers, who would manage a complex project. Needs and requirements for certification of Project Managers began to emerge. Actually, it is equally obvious that a Project Manager shall have a basic knowledge of how to run a 3 million dollars project , as it is to require a driving license for someone driving a motorcycle. Project management is a profession that requires specific knowledge and skills Local certification has existed for some time, but has not been widely practiced"--
