Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	This resource examines the need for competency-minded training in clinical psychology and provides a comprehensive overview of specific functional and foundational competencies in the specialty. Each chapter defines competence in specific functional domains such as assessment, case formulation, consultation, teaching, administration, management and supervision, scientific methods and research, and interventional competencies within four major theoretical models (interpersonal, cognitive-behavioural, family systems, and contemporary psychodynamic psychotherapies).
