Sommario/riassunto	The period from 1850 to 1876 was the most transformative era in American history. During the course of this tumultuous quarter century Americans fought a bloody civil war, tried to settle the issue of state versus central government power, recognized the dominance of the

new industrial economy over the older agricultural one, and ended slavery, long the shame of the nation. At the same time, a major political realignment occurred with the collapse of the "second American party system" and the emergence of a new party, the Republicans. But the defeat of slavery-the chief catalyst for the birth of the Republican party-was at best a limited success. The Constitution had been rewritten to abolish slavery and guarantee equal protection under the law, but social equality for African Americans and expanding freedom for others remained elusive throughout the nation. For these triumphs and enduring tragedy, the Republican party, which became in time and memory the party of Abraham Lincoln, bore primary responsibility. This collection of six original essays by some of America's most distinguished historians of the Civil War era examines the origins and evolution of the Republican party over the course of its first generation. The essays consider the party in terms of its identity, interests, ideology, images, and individuals, always with an eye to the ways the Republican party influenced mid-nineteenth-century concerns over national character, political power, race, and civil rights. The authors collectively extend their inquiries from the 1850's through the 1870's to understand the processes whereby the second American party system broke down, a new party and politics emerged, the Civil War came, and a new political and social order developed. They especially consider how ideas about freedom in the 1850's coalesced during war and Reconstruction to produce both an expanded call for political and civil rights for the ex-slaves and a concern over expanded federal involvement in the protection of those rights. By observing the transformation of a sectional party born in the 1850's into the "Grand Old Party" by the 1870's, the authors demonstrate that no modern political party, even the one that claims descent from Lincoln, has surpassed the accomplishments of the first generation of Republicans.
