Sommario/riassunto	Rhetorical analysis of texts exposes plausible 'truths' and presumptions implied by the writer's presentation. In this volume, Leslie Gardner analyses the master psychologist Jung, who claimed to be expert at uncovering personal, psychological truths. In his theoretical writings, his rhetoric reveals philosophical ramifications which bear strong similarities to those of the rhetorician of the 18th century, Italian philosopher Giambattista Vico. This book is driven by an interest in arguing that it is possible to read Jung's works easily enough when you have a set of precepts to go by
