Sommario/riassunto	<p>The risks posed by forest destruction throughout the world are highly significant for all. Not only are forests a critical source of timber and non-timber forest products, but they provide environmental services that are the basis of life on Earth. However, only rarely do beneficiaries pay for the goods and services they experience, and there are severe consequences as a result for the poor and for the forests themselves.; It has proved difficult to translate the theory of market-based approaches into practice. Based on extensive research and case studies of biodiversity conservation, watershed protected and carbon sequestration, this book demonstrates how payment systems can be established in practice, their effectiveness and their implications for the poor.</p>

Sommario/riassunto	In his analysis of Europe's ambivalence toward jihadist terror and the spread of aggressive Islamism, with particular emphasis on the European responses?or lack thereof?to this violent anti-modernism, Russell A. Berman describes how some European countries opt for appeasement and apologetics, whereas others muster the strength to defend their way of life and stand up for freedom. He describes a complex continent of different nations and traditions to further our understanding of the range of reactions to Islamism.
